

Q: Write a PHP script to upload and display the images

1. Database setup in SQL

```
CREATE TABLE images (  
  id INT AUTO_INCREMENT PRIMARY KEY,  
  file_name VARCHAR(255) NOT NULL,  
  Image LONGBLOB  
);
```

2. Create a folder “uploads” in C:\xampp\htdocs\folder\

3. db.php

```
<?php  
// Database configuration  
$conn = mysqli_connect("localhost", "root", "", "company_db");  
  
if (!$conn) {  
  die("Connection failed: " . mysqli_connect_error());  
}  
?>
```

4. Imgininsertform.php

```
<?php include 'db.php'; ?>  
  
<!DOCTYPE html>  
<html>  
<head>  
  <title>Image Upload System</title>  
  <style>  
    .gallery-item { display: inline-block; text-align: center; margin: 10px; border: 1px solid  
#ddd; padding: 5px; }  
    img { display: block; margin-bottom: 5px; }  
  </style>  
</head>  
<body>  
  
  <h2>Upload New Image</h2>  
  <form method="POST" action="upload.php" enctype="multipart/form-data">  
    <label>Select Image:</label>  
    <input type="file" name="uploadfile" required>  
    <button type="submit" name="upload">Upload Now</button>  
  </form>
```

```

<hr>

<h2>Gallery</h2>
<?php
$sql = "SELECT * FROM images";
$result = mysqli_query($conn, $sql);

// Check if there are any images
if (mysqli_num_rows($result) > 0) {
    while ($row = mysqli_fetch_array($result, MYSQLI_BOTH)) {
        echo '<div class="gallery-item">';
        // We use 'file_name' as the column name here
        echo '';
        echo '<p>' . $row["file_name"] . '</p>';
        echo '</div>';
    }
} else {
    echo "No images uploaded yet.";
}
?>

</body>
</html>

```

5. upload.php

```

<?php
include 'db.php';

if (isset($_POST['upload'])) {
    $filename = $_FILES["uploadfile"]["name"];
    $tempname = $_FILES["uploadfile"]["tmp_name"];

    // Use an absolute path to avoid "No such file" errors
    $targetDir = __DIR__ . "/uploads/";

    // Check if the directory exists, if not, create it
    if (!is_dir($targetDir)) {
        mkdir($targetDir, 0777, true);
    }

    $folder = $targetDir . $filename;

    if (move_uploaded_file($tempname, $folder)) {
        $sql = "INSERT INTO images (file_name) VALUES ('$filename')";
        if (mysqli_query($conn, $sql)) {
            header("Location: imginsertform.php?upload=success");
        } else {

```

```
        echo "Database Error: " . mysqli_error($conn);
    }
} else {
    echo "Failed to move file. Try creating the 'uploads' folder manually in " . __DIR__;
}
}
?>
```
